Our Other Services

We're here to support your community and help families and educators work together so children can flourish!

Parent information sessions

We offer information sessions for parents and carers covering key developmental topics like sensory needs, emotional regulation, and school readiness. Families leave with practical ideas to support their child's growth at home.

Kindy screenings with follow up written results.

We offer fun, play-based screenings to check key developmental skills such as fine motor, coordination, and self-care. Families receive a written summary with practical tips and recommendations for next steps.

Kindy Environment Support Visit

Our OT visits your kindy for 2 hours (plus travel) to observe daily routines, activities, and the environment. We work alongside educators to identify challenges and share practical ideas to help every child thrive in your setting.

Please get in contact for more information & individualised pricing.
