KINDY UPLIFT PACKAGES

Our experienced OTs have training in a range of areas that matter most in kindy, including sensory processing, executive function, and classroom environments that support participation.

We draw on this expertise in the services we deliver to kindies:

- **Environment assessments** - Practical, evidence-informed recommendations in-room to encourage inclusive learning.
- **Follow-up in-room coaching** - Working alongside educators to refine strategies.
- **Educator PD** - Build shared understanding across your team.
- **Written summaries** - Observations and progress mapped to your Kindy Uplift priorities.

All packages can be customised to suit your centre's needs.

Travel is included in every package.
